 - **Exposure:** Python3, Django, Flask, AngularJS, Node.js, PostgreSQL, Jest, Enzyme
-

> Professional Experience

Rillamarks | FullStack Web Developer | Austin, TX | June to Current

- UI development for features that are aimed at the users in React.js with Bootstrap.
- Designed an HTML5 video UI from scratch that functions like a prefabricated video module.
- Implemented share features so creators could add users in their network as collaborators for the content with varying levels of privileges depending on the permissions granted to the collaborator.
- Added a Notifications system that alerts users when an event takes place that's relevant to themselves.
- Incorporated mp3 support for an already existing audio feature..

DarkOwl | Web Developer | Austin, TX (Remote) | Nov. 2019 to Feb. 2020

- Built a Node.js template for customers to integrate DarkOwl's API into their technologies. It handled encryption with CryptoJS. This brought in a client who was on the fence.
- Worked on a project called Admin Portal. There was heavy use of ReactBootstrap and I was tasked with redesigning an already existing Angular version to React.js so that it would function and appear the exact same way.
- Redesigning Spotlight which was a UI for sampling DarkOwl's dark web database with example queries that demonstrated the kind of data that our organization had access to.

Rock Agile (Contract) | Web Developer | Charlotte, NC | Jan 2018 to June 2018

- FullStack development with Rails on a CMS called Infinity ERP which was a platform for making and placing orders. We migrated a client's app from Rails 2.3 to Rails 5.0.
- Executed FrontEnd tickets that composed of a mix of the .erb template engine and Angular.js
- Repaired many UI bugs that arose from the version migration.

USIC | Locate Technician | Black Mountain, NC | June 2015 to Oct 2016

- Locate Technician for optical fiber and copper communication lines, Duke/Progress Energy assets, Piedmont Gas lines. Forced me to develop communication skills in order to coordinate with excavators so that we could minimize damage to underground infrastructure as possible.
 - Executed tickets in all conditions to complete tasks that made a lot of people quit just from the training which helped me develop grit.
-

> Education

- **Fullstack Web Developer Apprenticeship** - Bloc
- **Art Institute of Atlanta** - Bachelor's of Fine Arts, Majored in Game Art and Design

> Activities

- **Youtube** - I have a youtube channel that I use to keep myself accountable while I code.
